Read This Before Installing Your MicroVAX 3100 or VAXserver 3100

MicroVAX 3100 and VAXserver 3100 systems are optionally supplied with the VMS operating system pre-loaded onto the system disk. Following hardware installation, the systems are ready to boot. The information provided under the following headings, System Start-Up, System Disk Back-Up, Tailoring VMS, and Warranty applies to systems of this type.

System Start-Up

Boot your system in accordance with the instructions in Section 2.7 of the *MicroVAX 3100 and VAXserver 3100 Owner's Manual*. The system disk includes an on-line copy of the release notes for the current version of VMS.

System Disk Back-up

Following a successful boot operation, you should make a back-up copy of the system disk. See Appendix G of the *MicroVAX 3100 and VAXserver 3100 Owner's Manual* for information on backing up and restoring your system disk.

Tailoring VMS

Unwanted VMS files can be deleted to increase the space available for applications on the system disk. See Appendix H of the *MicroVAX 3100 and VAXserver 3100 Owner's Manual* for information on tailoring VMS files on your system disk.

Warranty

NOTE: The warranty policy which follows does not apply to customers in Europe.

WARRANTY POLICY

Software that is delivered on a system disk is not covered by warranty. It is provided as a convenience to the customer. The customer is solely responsible for completing the installation of the software. Digital encourages all customers to buy the VMS media and documentation kit which includes complete installation instructions, for this reason.

No other change in Digital's current software warranty policy is implied by the pre-loading of the VMS distribution kit onto the system disk at the factory. Refer to the Software Product Descriptions of VMS and DECnet-VAX for further warranty information.

PCLAN/Server 3100

If your system is a PCLAN/Server 3100 system, refer to the installation checklist in Appendix A of the *PCLAN/Server VMS 3100 Installation Guide*. This checklist provides a guide to the complete installation (hardware and software) of the PCLAN/Server 3100 system.

VMS Media and Documentation Kit

For your reference, the order number for the VMS media and documentation kit is **QA-001AA-B5.5.2**.
